Agenda
- Progress:
    - MVP Done
- To Discuss:
    - Cleaning up code (commenting, fixing edge cases (e.g. no events), etc)
    - Scheduling our demo (Brian won't be here Thursday)
    - MVP Feedback
- To Do:
    - Get rid of things we implemented but didn't end up using
    - Implement new features
        - Suggestions
        - Menu creation
        - Changing stock
        - Text notifications
    - Fix bugs
        - User has no events
- Meeting Minutes:
    - Consider making a developer app and a prod app to make testing easier to TA's
    - Meeting still Friday for Demo
    - Authentication Token Live Longer
    - For final projects, set up different events for four cases to facilitate testing
    - As guest, able to press dibs multiple times for pressing dibs on same drink
        - Call dibs on as many drinks as you want
        - Consider showing current orders for a user and how many drinks they have left
            - SMS + Show this status as opposed to waiting page
        - Drink Limit should solve this
    - Suggestions:
        - Separate from menu creation functionality?
        - Host gets information and then makes judgement on how to establish menu
        - Suggestions page/Host chooses from list of suggestions
    - Bug where if there are no events, the foreach loop will not be entered and not render dashboard for user of their events
    - Ok to leave SMS notifications for last
    - Plan on implmeneting Suggestions/Menu/Stock change for Demo Friday
